

REVITALIZANT®

– the new word in the world of lubricant additives

As a lubricant manufacturer, you need a competitive edge. It is essential that you constantly improve and innovate your product line to attract and maintain customers.

XADO has the innovative new product you need – Revitalizant!

life span
x2.5

↑ XADO Revitalizant® can be applied to any type of motor, transmission and hydraulic oil, and consistent lubricants.

XADO's Revitalizant® technology is an absolutely new product that is worlds apart from existing additives.

Our internationally patented Revitalizant® is a nano-particle technology that modifies friction surfaces and provides a superior, new method for anti-wear lubrication properties in boundary and semi-fluid lubrication.

Through years of research, real-world application and international sales, XADO's Revitalizants® have proven their ability to restore, strengthen and protect metal-to-metal surfaces

↑ Revitalizants® compensate current wear of a mechanism's metal parts, prolongs their life span, and reduces power inputs.
