RESTORATION

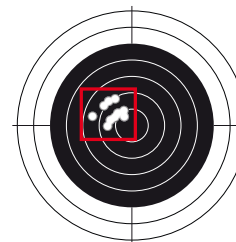

RESTORATION OF SHOOTING ACCURACY

SNIPEX
Gel-REVITALIZANT®

BEFORE

AFTER

Shooting accuracy before and after application of SNIPEX

SnipeX Gel-REVITALIZANT® is designed to restore the surface of the barrel bore of a gun, extend its service life span and increase shooting accuracy. Application of SnipeX Gel-REVITALIZANT® allows to increase shooting accuracy to the nominal values for guns with the significantly exhausted service life span and to improve the class of a new gun.

SNIPEX Gel-REVITALIZANT®

A unique composition designed for improvement of shooting accuracy. REVITALIZANT® restores the inner surface of the barrel bore thus extending its service life span and increasing accuracy. The product is recommended for treatment of rifled barrels of all types and calibres with regular and chrome-plated surfaces.

VERYLUBE

Universal penetrating lubricant

Easily and quickly penetrates into threaded and other joints, returns mobility to rusted parts. Protects parts from corrosion and oxidation. Lubricates any friction surfaces of parts.

Application instructions

1. Clean the barrel bore as usual and wipe it off dry.
 2. Apply a small amount of the gel (up to 1 ml) throughout the inner bore surface with a cleaning rod.
 3. Apply a small amount of the gel on the surface of the bullet.
 4. Make a shot.
 5. Repeat steps 2 and 3 until the tube is completely emptied.
 6. Clean the barrel bore as usual.
- To complete the treatment it is recommended to make from 10 to 30 shots (depending on the amount of the applied gel).

VERYLUBE Silicone lubricant

Designed for lubrication of friction pairs of various materials. Prevents plastic and rubber parts from cracking in the sun, cleans them, restores elasticity and original appearance of parts.

CARE PRODUCTS FOR WEAPONS

VERYLUBE

Universal gun oil

Designed for everyday care of arms. Easily and effectively cleans all types of arms from scale, soot, gunpowder and other contaminations, protects from corrosion. Possesses high penetrability, quickly gets to all parts of a weapon.

SNIPEX Gun cleaning grease VERYLUBE Gun cleaning grease

Designed for arms cleaning after shooting. Easily eliminates gunpowder scale from the barrel. Quickly displaces contaminations from nooks of breech mechanisms and triggers. Effectively lubricates threaded, rotary and pinning joints and protects them from corrosion.

SNIPEX Total Cleaner for small arms

Gel for cleaning gun barrels. Effectively removes all kinds of contaminations from the gun barrel surface. Quickly displaces contaminations from hard-to-reach places. Suitable for all types of guns. Reliably protects from corrosion.

SNIPEX Wood Restorer

Product for care of wooden parts of guns (butt, fore grip). Restores original appearance of the surface structure. Makes the wooden surface water-resistant. Prevents appearance of spots and rough edges.

VERYLUBE Cleaning foam for gun barrels

Quickly (within 15–30 min) removes copper and other soft metal residues from the inner surface of the barrel. Can be used for regular arms cleaning (from scale and gunpowder gases).

SNIPEX Total Cleaner for barrels of artillery-type weapons

Special product for cleaning barrels of artillery-type weapons. Effectively and quickly removes scale, copper and lead residues from the inner surface of the barrel. Displaces contaminations from hard-to-reach places. Cuts the cleaning time by 3–4 times. Reliably protects from corrosion.
